Welcome to the SALTO Room Layouts Idea Book—a collection of smart, flexible design concepts built to inspire dynamic learning environments. Inside, you'll find layout examples that showcase how SALTO's mobile tables, storage, and accessories adapt to the ever-changing needs of today's classrooms. Whether you're planning for STEAM, maker spaces, or multipurpose learning, this guide helps bring your vision to life.

Elementary School

SALTO products bring flexibility and function to elementary classrooms, creating bright, organized spaces that keep young learners engaged, active, and ready to explore. Designed for easy transitions between activities, they help support a dynamic and responsive learning environment.

LAYOUT 1

Group & Guide

Storage pulls double duty when serving to also segment distinct learning spaces. This keeps essentials close by, while also acting as barriers that manage how students move through and utilize the classroom—with the added bonus of maintaining visibility for the teacher.

Storage Partitions

Featured Models

Mobile Storage - 310 Series | J9000

Mobile Storage - 330 Series | J1200
Par, Adj. Shelves

Mobile Storage - 220 Series | J1130

STEM Classroom

STEM classrooms are constantly evolving. SALTO supports this with mobile tables, work centers, and flexible accessories that make it easy to shift between group work, solo tasks, and hands-on projects. Educators can quickly adapt the space to meet changing needs throughout the day.

LAYOUT 1

Create & Collab

Designed for flexibility, this STEM layout features trapezoid-shaped Multi-Purpose Tables (MDT40) that pull together for group collaboration or separate for focused, hands-on work. Mobile storage and Maker Centers keep tools close and the space easy to reset throughout the day.

LAYOUT 2

Display & Adapt

Built for STEM learning, this layout features mobile storage and wall panels that adapt to changing activities. The Wall Panel System includes options like perforated panels, magnetic markerboards, and shelving—ideal for hanging tools, displaying instructions, or organizing materials for hands-on projects.

Featured Models

Mobile Storage - 340 Series I J1490
Doors, Adjustable Shelf, Tote Storage

LAYOUT 3

360° Teaching

Teachers often get left out of classroom planning. This layout gives them a dedicated setup with a 360° mobile wardrobe—featuring front storage, side perforated panels, and a magnetic markerboard on the back—plus a teacher desk for a complete STEM teaching station.

Maker Space

Active learning is the focus in today's Maker Spaces. Make things easy on everyone by equipping the classroom with accessible and organized tool storage.

LAYOUT 1

Move Maker

Sometimes resources are shared between classrooms. Mobile 3D Printer Carts make it easy to wheel technology where it's needed and back again.

Technology on The Move

LAYOUT 2

Maker Central

At the core of this layout are Maker Centers—providing sturdy, spacious surfaces built for hands-on projects. They're complemented by mobile storage units that keep tools, supplies, and in-progress work organized and within reach, supporting creativity and project-based learning from start to finish.

LAYOUT 3

Balance & Blend

This layout balances collaboration and individual work. Maker Tables anchor the room for heavy-duty team projects, while Maker Centers along the wall offer dedicated spots for solo tasks. Mobile storage doubles as room dividers, keeping tools organized and creating clear zones for different types of making.

Art Room

Being creative can be MESSY! Consider access to sinks, tool & supply organization, and a variety of storage options. That way students' creativity can soar rather than being bogged down by the limiting qualities of a low functioning space.

LAYOUT 1

Stocked Studio

This layout boasts plenty of fixed storage for less frequently used or large equipment, and bulk supplies—while also incorporating mobile storage for projects, tools, and hard-to-carry items like heavy clay.

LAYOUT 2

Artistic Access

This layout keeps materials moving with mobile carts stocked for specific projects or media. Whether it's painting, sculpting, or drawing, students can easily access what they need and return supplies when they're done. Carts can also serve as partitions to help define zones without closing off the creative flow.
